

One step ahead security

Leading offensive and defensive security consulting company

Bugsec Group is a leading offensive and defensive security consulting company, focused on ethical hacking, advance security research, SCADA infiltration, malware analyses, Cyber readiness review and other services to increase customer security.

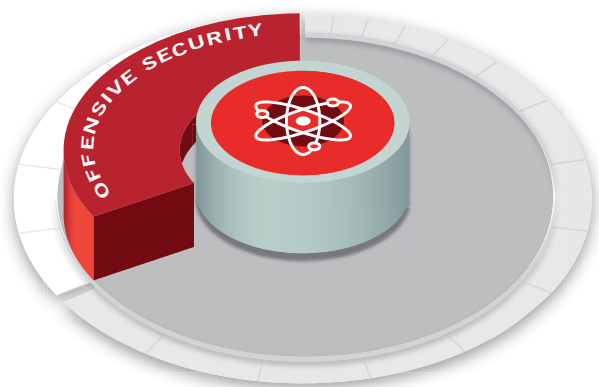

Since 2005, Bugsec has been providing security consulting services to global companies in the fields of finance, government, hi-tech, communications, utilities and other markets.

The Bugsec team is made up of some of the world's most talented offensive and defensive experts and security researchers, who work together with intelligence and law enforcement organizations around the world to help our customers protect their assets.

For more than a decade, Bugsec's professional excellence, deep technical capabilities and unique access to cutting edge technologies have enabled us to assist a range of industry leaders to overcome their security challenges. With specialists in application, infrastructure, ICS, Mobile and cloud security, we aim to maintain our outstanding reputation of delivering value and excellence to all our clients.

OFFENSIVE SECURITY

Bugsec is defined today as the strongest offensive security company which was founded in Israel, and includes the largest attack team in Israel. This team conducts a wide variety of offensive activities that go from evaluating the strength of applications/infrastructure through testing information security products and ways to bypass them, up to conducting intensive research on technology and development tools for attacking targets. The approach of the team does not distinguish between the different areas of expertise (applications, infrastructure, mobile) and confirms the need for development of broad-based, advanced knowledge in different platforms.

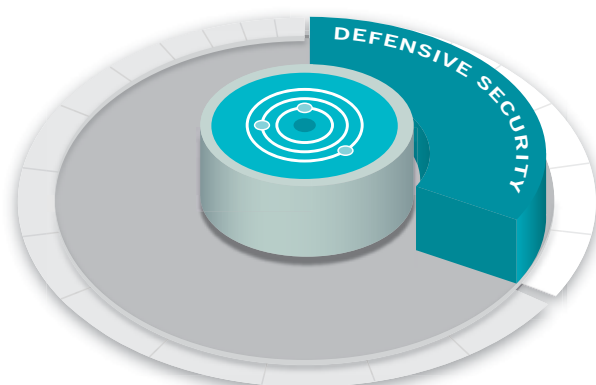

- Enterprise Cyber Simulation
- External Takeover (Red Team)
- Data Leakage Examination
- Product security Evaluation
- Application\Infrastructure
- Penetration test
- DDoS Simulation
- Phishing Campaigns
- Social Engineering Awareness
- Vulnerability assessments

DEFENSIVE SECURITY

This team is composed of experts and architects in the field of cyber security, who have extensive experience in the world of infrastructure and applications with in-depth understanding of creating and writing policy and procedures, conducting hardening and testing of security for various systems. A dedicated staff who are experts in the field of secure development and know how to make connections between attack capabilities and correct code writing and accompaniment of organizational SSDLC.
